call 866-716-4204

What you will Learn?

- ▶ Introduction to Bosch Electronic Service Information (ESI [tronic] 2.0)
- ▶ Construction and operating principles of individual components, interaction within the complete system, disassembly, reassembly, testing and failure mode analysis of VE pumps, torque control, related aneroids (LDA's), K-KSB, LFB ancillary devices, test nozzles and holders
- ▶ Use of related Bosch service information systems

What will you Earn?

By the end of this training you will have the confidence to diagnose, test, repair and calibrate specified Bosch diesel fuel systems and use the ESI [tronic] 2.0 Service Information System. You will also receive an official Bosch Certification!
